CANDIDATE SUMMARY

I've worked on both sides of the software world—first as a project manager leading teams and optimizing systems, and now as a developer actually building them. I transitioned into software engineering because I realized the part of my job I loved most was the technical side—digging into APIs, learning how things are built. I've been sharpening my skills in Python, JavaScript, and backend systems while finishing my CS degree. I love solving real problems with code and seeing ideas come to life.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL, C++, Java
- **Frameworks:** React, Node.js, Tailwind,
- **Tools:** Git, Docker, JIRA, APIs, Linux, IDE,
- **Concepts:** Data Structures, Algorithms, Agile, Networking

TECHNICAL PROJECTS

Weather API Dashboard | JavaScript, React

- Built interactive weather application using OpenWeather API
- Implemented responsive design with dynamic background changes

Vending Machine System | Python, SQLite

- Developed CLI inventory management with CRUD functionality
- Added sales reporting with time-based analytics

EDUCATION

Western Governors University

Expected: March 2026

Bachelor's, Computer Science

University of Colorado - Boulder

August 2018 - May 2020

Bachelor's, Strategic Communications

PROFESSIONAL EXPERIENCE

Alan Johnson Construction

Remote

Web Developer

April 2022 - Current

- Applied systems thinking to design modular UI components
- Developed scalable backend services for long-term growth
- Reduced site downtime by 85% through proactive monitoring
- Lowered bounce rate by 32% through SEO and responsive design
- Enabled faster publishing with decoupled architecture
- Boosted lead conversions by 27% year-over-year

Celebrity Home Loans

Remote

Project Manager

July 2020 - July 2022

- Managed 40 team members across 5 teams
- Reduced redundant tech stack 40% saving employer over \$15,000
- Coordinated implementation of new software's with the IT dept that contributed to 15% faster onboarding time for new employees, revamped learning materials with Marketing and L&D teams.
